## PROFESSIONAL SUMMARY

Motivated software developer with 2+ years background in designing, creating, and administering web-based applications for business operations. Proven ability to leverage full-stack knowledge and experience to build interactive and user-centered designs to scale.

## WORK EXPERIENCE

Design Blue Manila

August 2023 – Present

Web Developer

Makati, Metro Manila

- Developed Laravel APIs for backend data processing enabling communication between frontend and backend components.
- Deployed projects on Amazon Web Services (AWS), utilizing services like EC2 and Lightsail, ensuring scalability.
- Created custom content management systems and designed front-end components using NuxtJS.
- Maintained over 4 Wordpress websites, ensuring consistent functionality, security, and plugin integrations.

Institute for Labor Studies

October 2020 – July 2023

Information Systems Analyst II

Manila, Metro Manila

- Developed Laravel-based website applications for internal operations, streamlining processes and improving productivity.
- Redesigned and rebuilt the institute's website, resulting in a 30% increase in traffic and 40% in user experience.
- Initiated and devised a website migration plan, preserving data backlinks from 2007 to 2021 and improving its SEO Ranking
- Maintained and developed custom modules for various content management systems such as WordPress and Joomla.
- Formulated and documented detailed systems planning, analysis, and design documentation, along with user-manuals.
- Troubleshooted, tested and maintained existing information systems.

Microlane Credit Union, Inc.

August 2019 – July 2020

Loan Processor

Cabanatuan City, Nueva Ecija

- Led a team of 4 account officers and reached monthly loan release quota for 3 consecutive months.
- Prepared financial reports, loan disclosures, company checks and vouchers.
- Maintained over 200 client files, documents, and collaterals.

Philippine Rice Research Institute

February 2019 – May 2019

Android Developer Intern

Science City of Muñoz, Nueva Ecija

- Spearheaded the development of an android application using Kotlin to monitor microclimate, air quality, water quality, and water level, resulting in a high-performing, user-friendly product.
- Integrated third party APIs such as Google Maps for location and custom map overlays and Dark Sky for weather data forecast.

## EDUCATION

Uplift Coding Bootcamp

February 2023 – Present

Full Stack Development Course

Remote

- A 6-months intensive coding bootcamp design for full-stack development
